

How to use your Pen Pal Letter Writing Kit

1. Choose the A4 or US Letter PDF based on your paper size.
2. Print stationery pages at 100% scale. Use borderless printing if your printer supports it.
3. For envelope templates, print on cardstock or thicker paper, cut outside the flaps and fold on the guide lines.
4. Import the CSV tracker into Google Sheets, Excel, Airtable or Notion.
5. Use the Notion markdown file as a simple copy/paste dashboard structure.
6. Personal use and gift use are included. Do not resell, redistribute or claim the files as your own.

No physical item is shipped. Colors may vary slightly by screen and printer.
